TITLE	Vaccine-Preventable Diseases of Childhood. January 1986 through August 1988. Current Bibliographies in Medicine No. 88-12.
INSTITUTION	National Library of Medicine (DHHS/NIH), Bethesda, Md.
PUB DATE	88
NOTE	46p.
AVAILABLE FROM	Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (Stock No. 817-004-00012-1, $2.00).
PUB TYPE	Reference Materials - Bibliographies (131)
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*Children; *Communicable Diseases; *Disease Control; *Immunization Programs

ABSTRACT

Unless there are contraindications, there are seven diseases for which the Centers for Disease Control recommends all children be vaccinated: (1) diphtheria; (2) measles; (3) mumps; (4) pertussis; (5) poliomyelitis; (6) rubella; and (7) tetanus. The 748 references in this bibliography relate to various aspects of these vaccines and the diseases they prevent, as well as smallpox. The references are to English language journal articles or conference proceedings. (JD)

SERIES NOTE

Current Bibliographies in Medicine (CBM) is a continuation in part of the National Library of Medicine's Literature Search Series, which ceased in 1987 with No. 87-15. Each bibliography in the new series covers a distinct subject area of biomedicine and is intended to fulfill a current awareness function. Citations are usually derived from searching a variety of online databases. NLM databases utilized include MEDLINE, AVLINE, BIOETHICSLINE, CANCERLIT, CATLINE, HEALTH, POPLINE, AND TOXLINE. The only criterion for the inclusion of a particular published work is its relevance to the topic being presented; the format, ownership, or location of the material are not considered.

Comments and suggestions on this series may be addressed to:

Ordering Information:

Current Bibliographies in Medicine is sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. To order the entire CBM series (approximately 20 bibliographies/year), send $26.00 ($33.50 foreign) to the Superintendent of Documents citing GPO List ID: CBM88. Orders for individual bibliographies in the series ($2.00, $2.50 foreign) should be sent to the Superintendent of Documents citing the title and the GPO Stock No. printed on the title page.

Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through September 30, 1989.

VACCINE-PREVENTABLE DISEASES OF CHILDHOOD

Immunization is among the most effective preventive measures available today. Immunization programs for children in the United States currently reach 90% to 96% of that patient population. Morbidity and mortality from tetanus, diphtheria, pertussis, poliomyelitis, measles, mumps, and rubella have drastically decreased, while the threat of smallpox has been virtually eliminated. Despite the effectiveness of vaccination programs, however, there are still concerns about the adverse effects experienced by some patients as well as the rising cost of the vaccinations themselves.

Even with the high rate of vaccinations performed today, small outbreaks of some of these diseases still occur, threatening young and old alike. The prevention of infectious diseases by immunization is a continuing process, constantly evolving and requiring the involvement of scientists, health-care providers, parents, and children. To remain effective vaccination rates must remain high. Unless there are contraindications, there are seven diseases for which the Centers for Disease Control recommend all children be vaccinated: diphtheria, measles, mumps, pertussis, poliomyelitis, rubella, and tetanus.

The references in this bibliography discuss various aspects of the above vaccines and the diseases they prevent, as well as smallpox. The references are to English language journal articles or conference proceedings published between January 1986 and August 1988. References have been limited to those discussing infants or children and adolescents, and to immunization and incidence in the United States, Canada, or Great Britain. Citations have been divided into eleven categories, and a citation may appear in more than one category (for example, a citation on DPT vaccine would appear only under the "Diphtheria/Pertussis/Tetanus" category while a citation on smallpox and mumps would appear under both categories). Citations dealing with four or more of the diseases or vaccines or discussing vaccination in general have been placed in the "General" category.

SEARCH STRATEGY

A variety of online databases are usually searched in preparing bibliographies in the CBM series. To assist you in updating or otherwise manipulating the material in this search, the strategy used for the NLM's MEDLINE database is given below. Please note that the search strategies presented here differ from individual demand searches in that they are generally broadly formulated and irrelevant citations edited out prior to printing.

SS 1 = SUBS APPLY AE, AD, DE, PO, TO, SD, TU, ST, OC, PC, TM

SS 1 = SMALLPOX VACCINE OR RUBELLA VACCINE OR MEASLES VACCINE OR DIPHTHERIA TOXOID OR MUMPS VACCINE OR PERTUSSIS VACCINE OR ALL POLIOVIRUS VACCINE: OR TETANUS TOXOID

SS 2 = EXP SMALLPOX OR RUBELLA OR MEASLES OR DIPHTHERIA OR MUMPS OR WHOOPING COUGH OR ALL POLIOMYELITIS: OR TETANUS

SS 3 = SUBS CANCEL

SS 3 = *SMALLPOX VACCINE OR *RUBELLA VACCINE OR *MEASLES VACCINE OR *DIPHTHERIA TOXOID OR *MUMPS VACCINE OR *PERTUSSIS VACCINE OR ALL *POLIOVIRUS VACCINE OR *TETANUS TOXOID

SS 4 = *EXP SMALLPOX OR *RUBELLA OR *MEASLES OR *DIPHTHERIA OR *MUMPS OR *WHOOPING COUGH OR ALL *POLIOMYELITIS: OR *TETANUS

SS 5 = 1 OR 2 OR 3 OR 4

SS 6 = 5 AND NOT FOR (LA)

SS 7 = 6 AND EXP CHILD

SS 8 = 6 AND EXP ADOLESCENCE

SS 9 = 7 OR 8

SAMPLE CITATION

Citations in this bibliographic series are formatted according to the rules established for *Index Medicus*. A sample journal citation appears below. For journal articles written in a foreign language, the English translation of the title is placed in brackets and the language of publication is shown by a three letter abbreviation appearing at the end of the citation. Note also that a colon (:) may appear within an author's name. The NLM computer system automatically inserts this symbol in the place of a diacritical mark.

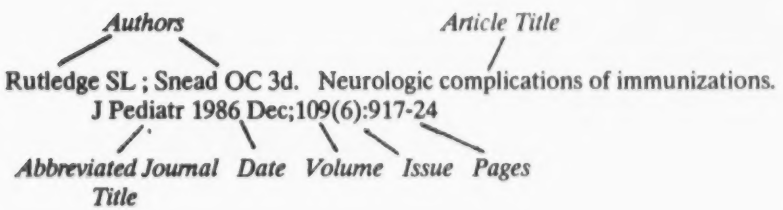

TABLE OF CONTENTS

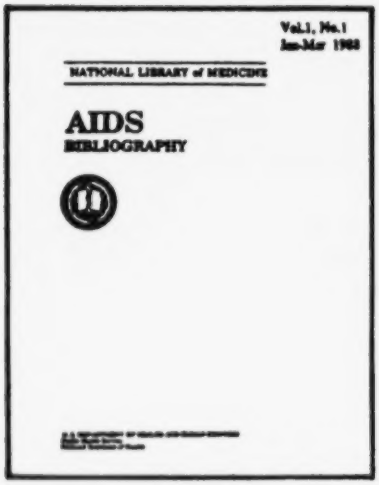
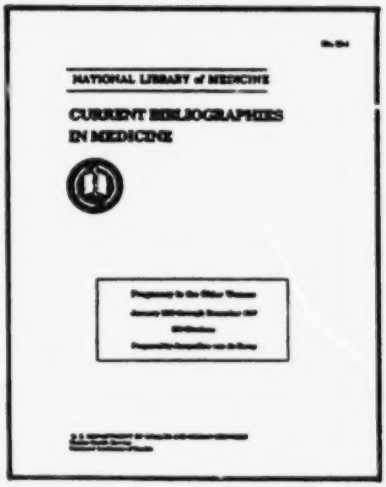
The National Library of Medicine Announces Two New Subscription Titles





☐ *AIDS Bibliography* *
$12 per year (4 Quarterly issues)
Individual issues $3 per copy
List ID: AID 88

Previously published within NLM's Literature Search Series. Each issue consists of about 60 pages of recent references to journal articles and books on AIDS.

☐ *Current Bibliographies in Medicine* *
$26 per year (Approx. 20 Titles/yr.)
Individual issues $2 per copy
List ID: CBM 88

A continuation of the Library's Literature Search Series, which ended in 1987. Topics will continue to be chosen for their current popular interest in distinct subject areas of biomedicine (excluding AIDS).

*Subscribers receive all issues for a given calendar year without regard to the date of order.

Superintendent of Documents Subscriptions Order Form

Charge your order. It's easy! DISCOVER VISA

Please enter my subscription for the item(s) checked above.

1. The total cost of my order is $ _____ . Price includes regular domestic postage and handling and is subject to change. International customers please add 25%. For telephone orders please call 202-783-3238.

Please Type or Print

2. _____
(Company or personal name)
_____
(Additional address/attention line)
_____
(Street address)
_____
(City, State, ZIP Code)
(_____) _____
(Daytime phone including area code)

3. **Please choose method of payment:**
☐ Check payable to the Superintendent of Documents
☐ GPO Deposit Account ☐☐☐☐☐☐☐-☐
☐ VISA or MasterCard Account
☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐
_____ ***Thank you for your order!***
(Credit card expiration date)
46 _____
(Signature)

4. **Mail To:** Superintendent of Documents, Government Printing Office, Washington, D.C. 20402-9371
